### Objective

Experience in management and consulting for 2.5+ years in ERP and SAAS industries. I've worked as a business analyst for at least 1.5 years, and I managed products for 1.5+ year. a track record of inspiring teams from all disciplines to create and market great products. a strong analytical and problem-solving capacity. a strong background in managing backlogs, user stories, and product strategy.

### Company

**DB Schenker**
**Gurugram, Haryana**

### Project

**Project: Virtual Warehouse Implementation in Metaverse for Monitoring Activities**

As a proactive contributor, I participated in the creation of an innovative virtual warehouse within a metaverse environment at DB Schenker. This project aimed to provide a dynamic and immersive platform for monitoring various warehouse activities, leveraging the capabilities of virtual reality to enhance visualization and data-driven decision-making.

Responsibilities:

- Collaborated with a multidisciplinary team to design and implement the virtual warehouse.
- Leveraged my analytical skills to enhance real-time tracking and monitoring of warehouse activities.
- Contributed to the development of an interactive environment within the metaverse for collaborative engagement with data.

Achievements:

- Successfully created a cutting-edge virtual warehouse within the metaverse, providing an immersive experience for monitoring and managing activities.
- Revolutionized the way warehouse operations are observed and managed, offering enhanced visualization and data-driven insights.

- Empowered businesses and individuals to engage with data in novel ways, driving informed decision-making.

**Aliter Business Solutions
Goregaon, Mumbai**

*Project: E-Invoice Implementation in SAP*

*As a Business Analyst, I led a cross-functional team in the successful implementation of an E-Invoice solution within the SAP environment at Aliter Business Solutions. E-Invoicing, a digital invoicing system, streamlined the invoicing process, significantly reducing paperwork and enhancing overall efficiency.*

*Responsibilities:*

- *Collaborated with cross-functional teams including engineering, design, and marketing.*
- *Assisted the Project Manager in resource management, ensuring optimal utilization.*
- *Conducted interviews with customers, prospects, partners, analysts, and stakeholders, gathering essential feedback for the project.*
- *Supported the Project Manager in coordinating with stakeholders, ensuring smooth communication and alignment throughout the project.*

*Achievements:*

- *Successfully implemented the E-Invoice solution, leading to improved invoice generation, transmission, and receipt processes.*
- *Streamlined invoicing workflows, resulting in significant reduction of manual paperwork and associated errors.*
- *Enhanced overall operational efficiency and reduced processing time for invoices.*

**Project: Evolve for Industry 4.0 Automation**

As part of a dynamic team, I contributed to the development and implementation of Evolve, an innovative platform that bridged Enterprise Resource Planning (ERP) systems with Internet of Things (IoT) devices, revolutionizing Industry 4.0 automation.

Responsibilities:

- Collaborated with technical teams to seamlessly integrate ERP and IoT devices within the Evolve platform.
- Assisted in designing and implementing data-driven decision-making processes.
- Played a crucial role in enhancing productivity, optimizing operations, and promoting data-driven insights.

Achievements:
